# Introduction to Python

## Why Python?

# Python Tutorial

Python in a few words

- ▶ It is is *Scripting Language*

# Python Tutorial

Python in a few words

- ▶ It is is *Scripting Language*
- ▶ It is *Strongly Typed*

# Python Tutorial

Python in a few words

- ▶ It is is *Scripting Language*
- ▶ It is *Strongly Typed*
- ▶ It is *Dynamic*

# Python Tutorial

Python in a few words

- ▶ It is is *Scripting Language*
- ▶ It is *Strongly Typed*
- ▶ It is *Dynamic*
- ▶ It is *Object Oriented*

# Python Tutorial

Python in a few words

- ▶ It is is *Scripting Language*
- ▶ It is *Strongly Typed*
- ▶ It is *Dynamic*
- ▶ It is *Object Oriented*
- ▶ It has *Vast Libraries*

# Python Tutorial

## Python in a few words

- ▶ It is is *Scripting Language*
- ▶ It is *Strongly Typed*
- ▶ It is *Dynamic*
- ▶ It is *Object Oriented*
- ▶ It has *Vast Libraries*
- ▶ It is *Simple and non-obtrusive*

# Why Python

Because Python is a programming language designed for rapid development and a few other things

# Python Tutorial

Must and Must Not

- ▶ Always search first

# Python Tutorial

## Must and Must Not

- ▶ Always search first
- ▶ Never code longer than needed

# Python Tutorial

## Must and Must Not

- ▶ Always search first
- ▶ Never code longer than needed
- ▶ Import only what you need

# Python Tutorial

## Must and Must Not

- ▶ Always search first
- ▶ Never code longer than needed
- ▶ Import only what you need
- ▶ Run pychecker on your code
